Inspection Type:	**Subject Defendant Vehicle**
Inspection Tasks:	**Photos, Scans, CDR Download**

Specific/Optional Equipment

- CDR Download Kit
  - Charged Laptop
  - USB Drive
- Portable Car Jumper
- Tool Bag
- GoPro + charged batteries
  - SD Card
  - Suction Cup and Mount
- Umbrella
- Sunscreen
- Coat
- Change of Clothes
- Toyota TechStream license
- Kia/Hyundai Download Kit

Equipment at all Inspections

- Inspection kit
- Camera + charged batteries
- SD Cards: Camera, FARO Scanner
- Camera Neck Strap
- FARO Scanner (charged)
- Tripod for FARO Scanner
- Safety Vest
- Blanket (for ground)
- Cell Phone
- Business Cards
- Sunglasses
- Water

Procedures

Photos

- 8 Overalls
- VIN (through windshield)
- ALL stickers inside driver door
- Tires (overall, close-up, tire size)
- Odometer - if doing CDR Download, do at same time
- Interior overviews - from all doors
- Pedals
- Dashboard
- Seat Positions
- Registration (if present & accessible)
- Airbag position (deployed or un-deployed)
- Any damage (certain or potential)
  - If needed or beneficial, use pocket rod &/or marked tape to provide measurements)
  - Seatbelts, if necessary
  - Underneath car, if necessary. Use phone to help get decent photographs
- Each pass of CDR Download
- CDR Download setup

FARO Scans

- Insert SD Card into Scanner
- Mount scanner to tripod
- Power Scanner on
- Duplicate "Default Project"
- Rename to Pltf_v_Def_CarType
- Rename File Basename to Pltf_CarType
- Settings set to 1/8, 3x, 0° to 360° and -60° to 90°, Color is on
- Once scanner is in position, return to Home Screen, hit Play Button.
- Get out of the way of scanner, avoid bumping tripod. Takes ~4 minutes. Continue until finished.

CDR Download

- Check ahead of time if car is downloadable
- At inspection, double check downloadability on laptop. Choose CDR900, if possible
- Find appropriate adapter (if needed)
- Check notes
- Plug download module into laptop first, then into car, then turn car on (only into accessory mode)
- Take photo of odometer
- Select "New" (blank white paper icon) to start
- Select brand of car
- Request VIN from vehicle & double check it. If it cannot read it directly, type it in from sticker. Click "Done"
- Enter "Explico" for User, "Year Make Model" for Crash Number, and nothing for Crash Date. Done.
- Type "Download via DLC" or "Download via D2M"
- Identify which icons at the top now display as blue (as opposed to greyed out).
- Run any that are blue, one at a time.
- Take photos of each pass.
- Save recovered data, as .CDRx, .PDF, and .CSV
- Save all data onto USB Drive. Keep on laptop until certain data has been successfully uploaded to Dropbox. Clean out periodically.

CDR Troubleshooting

- Ensure ALL cables are secure. Push in firmly, re-seat if necessary.
- Go under the Test Module icon and click "Test CANplus" or "Test CDR900"
- Try different power levels of the car.

Inspection Tasks:	Miscellaneous

Specific/Optional Equipment

Equipment at all Inspections

- Inspection kit
- Camera + charged batteries
- SD Cards: Camera, FARO Scanner
- Camera Neck Strap
- FARO Scanner (charged)
- Tripod for FARO Scanner
- Safety Vest
- Blanket (for ground)
- Cell Phone
- Business Cards
- Sunglasses
- Water

Procedures

Measurement Photographs

- Line up pocket rod or marked tape. Do not block or cover damage.
- Take overview from at least 3 ft back, capturing entire area (down to ground, if necessary)
- Step half a pace closer, zoom in a bit, focus on damage area.
- "Sweep" damaged area, repeating this process:
  - Get overview photo from ~2.5 ft away at height of area of interest (e.g. ground, damaged areas, inflection points)
  - Zoom in, take photo.
  - Zoom in, take photo.
  - Get as close as seems reasonable & useful.
  - Back up, move to next area of interest, repeat process.
- Get any more angles of damage that seems helpful or insightful.

Damage Photographs

- See measurement Photographs for some instructions.
- Take overview photos of damage.
- Move along at damage height while ~3 ft away from damage, or however far back gives full picture.
- Zoom in when appropriate.

Plaintiff Scans

- If plaintiff is available and willing, perform plaintiff interior scans:
- Have plaintiff sit in vehicle and ask them to adjust the seat and body position to how they were sitting during the incident. If they cannot remember, have them sit as naturally and normally as possible.
- Scan interior from both front doors. Do in Black & White (turn Color off)
- Take photos of plaintiff position while scanning.

REMEMBER: be as polite and efficient with this process as possible! They are being helpful!
