ABS
Wabco at key on will have 4 or 6 clicks and go around truck once. Use Wabco toolbox to download data.

Bendix at key on will have 8 or 12 clicks and go around truck twice

Can also download trailer ABS with trailer connector J560 PLC and supply power with battery

Check coolant for damage. If damaged, may want to place coolant sensor into water to avoid re-writing a new fault code. Not important in Cummins bc Cummins saves first and last occurrence of fault code. Would be important for Detroit Diesel and Cat.

Toyota techstream
Gives data such as hard braking, swerve, etc.
